DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-28, drawn to a system, method, and program for generating a RFQ, classified in class 705, subclass 26.
- II. Claims 29-31, drawn to a system, method, and program for generating a RFQ having a data and metrics model, a state transition model, and a user interface workflow, classified in class 705, subclass 26.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a system, method, and program that does not require a data and metrics model, a state transition model, and a user interface workflow as required in invention II. See MPEP § 806.05(d).

SPECIES

This application contains claims directed to the following patentably distinct species of the claimed invention:

In the event Applicants elect Group I above, they are further obligated to elect among the following species as follows:

species of claims 2-4, 11-13, and 20-22;

species of claims 5, 6, 14, 15, 23, and 24;

species of claims 7, 16, and 25;

species of claims 8, 9, 17, 18, 26, and 27;

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 10, 19, and 28 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
